

7 råd for en Covid-19 smittefri kantine

7 tips to keep your canteen free from Coronavirus

Vask/sprit hænder inden du tager mad, og tag plastikhandsker på, så dine kolleger kan se du har vasket hænder.

Wash and sanitize your hands before entering the food area. Wear plastic gloves to signal that you have washed your hands.

Spred bordene ud med større afstand.

Place the tables with a lot of space between them.

Spis i flere faste teams, så smittekæder undgås.

Create teams that eat together every day, to prevent the spread of the virus.

Sæt afstandstape på gulvet ved buffeten, ligesom i supermarkeder.

Use tape on the floor to mark how far apart you should stand, as you queue for food.

**Husk!
Remember**

Covid-19 smitter ikke gennem mad.

There's no evidence of Covid-19 being transmitted through food.

Source: The Danish Food & Beverage Authorities/Fødevarestyrelsen.

Spis med 2 stole mellemrum ved bordene.

While eating, keep spacing of 2 chairs between each other.

Luft ud mellem hvert team eller under hele frokosten.

Ventilate the whole area before letting the next team entering, or keep ventilating during the entire lunch time.

Fjern salt- og pebersæt, dressing på flaske o.l.

Remove salt and pepper grinders, bottled dressings etc. from the tables.
